Outline

• RDA, the standard
  • review of key features
  • influence on RDA – FRBR and FRAD
  • comparison with AACR2
  • examples
RDA based on IFLA’s international models & principles

- *Functional Requirements for Bibliographic Records (FRBR; 1998)*
- *Functional Requirements for Authority Data (FRAD; 2009)*
- *Statement of International Cataloguing Principles (ICP; 2009)*
RDA, the standard

- Replaces AACR2
- Removal of Anglo-American bias
- Informed by FRBR and FRAD
- Designed for use in digital environment
- Consistent, flexible and extensible framework
- Compatible with international principles, models and standards
- Focus on organizing information for the benefit of the user
- Useable outside the library community
Addresses user tasks

FRBR:
• Find
• Identify
• Select
• Obtain

FRAD:
• Find
• Identify
• Contextualize
• Justify

• *ICP*s highest principle = “convenience of the user”
General Principles (ICP)

• Convenience of user
• Representation
• Common usage
• Accuracy
• Sufficiency and necessity
• Significance
• Economy

• Consistency and
• Standardization
• Integration
• Defensible, not arbitrary

• If contradict, take a defensible, practical solution.
Is a **content** standard

- **Not** a display standard (as was AACR2)
  - Does have appendix D for ISBD and appendix E for AACR2 style for access points

- **Not** an encoding standard
  - Use whatever schema you prefer (MARC 21, Dublin Core, etc.)
  - *MARC 21* used in these training materials (with blank space around subfield codes for ease in reading)
Includes authority data instructions

• Based on attributes and relationships in FRAD

• Authorized/variant access points and elements will for now be documented in authority records
Has **controlled** vocabularies

- Only a few **closed**: content, media, and carrier types; mode of issuance; etc.
- Most are **open**: cataloguer can supply term if needed term not in list
- Some vocabularies being registered on the Web
FRBR and FRAD in RDA

- each chapter records data associated with one particular user task
- uses the vocabulary and concepts of FRBR and FRAD
- organized according to the entities identified in FRBR and FRAD
- explicit explanation of the relation between the instructions and the user tasks
- emphasis on relationships and on clarifying the nature of the relationships
RDA: Taking advantage of the digital environment

- stop fussing about abbreviations
- more “take as is” – principle of transcription
- transcribe inaccuracies; add note if necessary
- enable re-use of metadata
AACR2: Rules From the Card Catalogue Era

- instructions about when to abbreviate and when not to abbreviate
- “transcription” but also required to omit and sometimes supply data
- use of [sic] for correction of inaccuracies
RDA: More Information for Users

- no more restrictions such as “rule of three”
- make the relationships between entities clear to the user:
  Appendices I, J, and K = lists of relationship designators
- no more Latin abbreviations
AACR2: Limitations of the 3x5 Card

- limits for description and access when there are multiple authors
- more focus on the single record, less on relationships
- “et al.”, “S.l.”, “s.n.”
Other Differences from AACR2

• Access points
  – Bible
  – Treaties
  – No more “Polyglot”
  – Birth/death dates (no more b. or d.)
  – More data in authority records

• GMD replaced by
  – content type – carrier type – media type
Relationships

• Between a person/family/corporate body and a resource
• Between one resource and another resource
• Between one person/family/corporate body and another person/family/corporate body
Person, etc., and a resource

• Two methods (RDA 18.4):
  – Authorized access point
  – Identifier

• Relationship designators in Appendix I

• Recorded in bibliographic and/or authority data
Between resources

• Three methods (RDA 24.4):
  – Authorized access point
  – Description (structured or unstructured)
  – Identifier

• Relationship designators in Appendix J

• Recorded in bibliographic and/or authority data
Between one person, etc., and another person, etc.

• Two methods (RDA 29.4)
  – Authorized access point
  – Identifier

• Relationship designators in Appendix K
• Recorded in authority data
AACR2 to RDA vocabulary

area element
main entry authorized access point

author, composer, etc. creator
carrier description
Variant Title

**AACR2**

21 Choice of Access Points

21.30J 2 Variant title. If considered necessary for access, make an added entry for any version of the title (e.g., cover title …) that is significantly different from the title proper.

**RDA**

2.3 Title

2.3.6.3 Recording Variant Titles

Record variant titles that are considered to be important for identification or access applying the basic instructions on recording titles given under 2.3.1
Abbreviations

**AACR2**

1.2B1. Transcribe the edition statement as found on the item. Use abbreviations as instructed in appendix B and numerals as instructed in appendix C.

**RDA**

2.5.1.4. Transcribe an edition statement as it appears on the source of information.

*No instruction to abbreviate.*

**Appendix B Abbreviations**

**B.4. Transcribed Elements**

For transcribed elements, use only those abbreviations found in the sources of information for the element.
Statement of responsibility

AACR2

1.1F7. [4 conditions when you do record titles of nobility, address, etc.]

…Otherwise, omit all such data from statements of responsibility.

RDA

2.4.1.4. Transcribe a statement of responsibility in the form in which it appears on the source of information. Apply the general guidelines on transcription given under 1.7.

no instructions to omit data in 1.7

2.4.1.4. Optional Omission

Abridge a statement of responsibility only if it can be abridged without loss of essential information.
Place of publication, distribution, etc.  
(AACR2 1.4D4; RDA 2.8.2)

Source has following information:
Blackwell Publishing, 2008
Malden, MA; Oxford; Victoria, Australia; Toronto

AACR2 -- if catalogued in Australia (first place + place in home country)

AACR2 -- if catalogued in England (first place + place in home country)

AACR2 -- if catalogued in Canada (first place + place in home country)

RDA (only first place recorded is required)
Rule of three

AACR2

21.6B and 21.6C

distinctions are made when two, three or more persons or bodies share responsibility

21.6B1. If, in a work of shared responsibility, principal responsibility is attributed … to one person or corporate body, enter under the heading for that person or body … Make added entries under the headings for other persons or bodies involved if there are not more than two.

A new format for a new standard

- written and delivered as an online tool
- online tool also delivers additional functionality
- easier to use, easier to teach
- individual or collaborative use
- efficiency and customization
  - more people at different levels of expertise can use it
  - easier to promote consistent application of standards
  - flexible and customizable for different communities of users
JSC Working Documents

http://www.rda-jsc.org/working1.html

- RDA Table of Contents
- Changes from AACR2
- Issues deferred until after the 1st release
- RDA Elements Table
RDA Online/ Implementation

• ILS: Input templates for cataloguing
  – Listing the elements and links to RDA guidelines (depends on the ILS vendor)

• Workflows in RDA Online
  – Step-by-step process with links to RDA guidelines
  – RDA Online wizard to create your own “workflows”
  – Share “workflows”
  – Ability to annotate instructions
RDA Toolkit - A Guided Tour

• Videos of webinars presented by ALA Publishing

http://rdaonline.org/rdaVideos.html
Changes for systems

• New MARC fields for RDA elements
  – Content type, carrier type, media type
  – Added relator terms (Appendix I)
  – Authority format fields for dates, places, etc., for names
  – MARC 21 Format Changes to Accommodate RDA
    http://www.loc.gov/marc/formatchanges-RDA.html
More system changes

• Input/verification functions (import/export)

• Indexes for new data elements
“Legacy” records

• Existing records generally will not need changing (exceptions: ‘global updating’ for Bible, Department)

• MARC 21 encoding standard
RDA Online and Local System

• Potential for integration with library systems

• Initially view in parallel through Web connection
RDA training

• LAC will make training and documentation available on the web for reuse

• FAQ on LAC’s website
  http://www.collectionscanada.gc.ca/cataloguing-standards/040006-1107-e.html

• Different models for delivery of training under consideration (working with Canadian Committee on Cataloguing)
  e.g., web seminars, “train the trainer”
